The Establishment of the National Vocational School of Tourism (VST)

Website and blockchain-based School Management System Agreement

Head Office:

Time Square 3, Street 317, and Street 335, Phnom Penh

Singapore Office:

105 Cecil Street 06-02 The Octagon Singapore (069534)

Project Summary

A digital, centralized data management system provides significant benefits for school-level administration by optimizing processes, resource management, and performance tracking using blockchain technology and decentralized digital identity.
This system empowers educational institutions to capture and deliver data in real-time directly to stakeholders, reducing administrative errors, delays, and burdens typically associated with quarterly and annual reporting.

Implementing Sala's School Management System (Sala-SMS) at the The Establishment of the National Vocational School of Tourism (VST) will streamline administration, making information capture, processing, analysis, sharing, reporting, and feedback both faster and more efficient. With seamless integration of Sala's Centralized Dashboard, Learning Management System (LMS), and Enterprise Website, VST will benefit from enhanced inter-departmental collaboration and strengthened alignment with its digital transformation objectives.

Sala is a locally developed, blockchain-based ecosystem of interconnected modules tailored specifically to Cambodian schools. The platform equips school administrators with tools to manage students' academic journeys from admission to graduation, including Student Performance Tracking, Classroom Attendance, Subject and Teacher Management, Scheduling, E-Learning, and Comprehensive Reporting.

As a Cambodian company, Sala contributes directly to the national economy by creating new jobs, promoting entrepreneurship, and supporting the growth of small and medium-sized enterprises (SMEs) within the digital sector. This local focus aligns closely with Cambodia's strategic e-governance goals and Rectangular Strategy priority areas. Furthermore, the system's local origin ensures that it is designed to address the specific needs of Cambodian school administrators without the complexity of unnecessary features, making it easy to adopt and highly functional within the local context.

The Sala team has deep expertise in deploying digital solutions across Cambodian schools, enabling them to provide effective and practical training essential for system adoption. Sala's LMS includes built-in training tools and manuals, giving VST Management and Staff easy access to resources that help them maintain proficiency and confidence in using the system, ensuring sustainable, long-term use.

Key advantages of Sala-SMS include:

1. **Real-Time Access through Mobile Apps**: Available on Android and Apple devices, the Student, Parent, and Teacher apps offer real-time access to school data. Teachers can efficiently record attendance, assess performance, and grade assignments, while students and parents can view approved performance and attendance records immediately, reducing processing time and enhancing transparency.
2. **Cloud-Based System with Instant Access**: As a cloud-based application, Sala-SMS requires no installation. School administrators can log in and start using the system immediately upon subscription. The package license includes ongoing updates and maintenance, ensuring reliable, high-performance operation without additional infrastructure or support costs.

With Sala-SMS, VST will be equipped with a robust, adaptable system that not only aligns with local educational needs but also supports Cambodia's broader digital and economic objectives.

Accountabilities

Sala Tech provides a team of subject experts that matches The Establishment of the National Vocational School of Tourism (VST)'s priorities and carries out the activities described above within the agreed-upon time frame

The Establishment of the National Vocational School of Tourism (VST) provides the resources that match Sala Tech's priorities and carries out the activities described above within the agreed-upon time frame.

The Establishment of the National Vocational School of Tourism (VST) agrees to:

- Assigns a leader within the organization to work with Sala Tech who can say YES or NO to project rollout.
- Provides access to senior management as needed
- Provide full support to unblock arise through the project implementation
- Provides access to documents, statements as needed
- Works collaboratively in a series of weekly meetings

Our Complete Support

Your IT Staff

Training in Phnom Penh and Sihanouville Campuses

Sala Services

Senior Engineers on call and on-side support both campuses

Remote Support

24/7 Monitoring all services and servers.

Our Guiding Principles

Run by local IT personal

Modular & Scalable

Easily maintainable with our local courses

Why Sala?

Sala is a Cambodian ed-tech startup with a clear and powerful vision: to enrich students' educational journeys through innovative technology. Although young, Sala is a well-established educational technology company that develops impactful solutions to improve both the learning and teaching experience, enabling seamless digital administration for schools. With expertise in digital transformation, Sala offers custom, integrable solutions tailored to meet each institution's unique needs, supported by organized training for smooth implementation.

As a local enterprise, Sala makes a direct impact on the Cambodian economy by creating jobs, fostering entrepreneurship, and supporting the growth of SMEs in the digital sector. Our products align closely with Cambodia's and the United Nations' Sustainable Development Goals (SDGs) by promoting inclusive, high-quality education and lifelong learning opportunities for all. Sala's ecosystem of integrable services is designed to work seamlessly together and is compatible with other digital tools, allowing for durable, scalable educational solutions.

Sala's commitment to excellence has earned it recognition as a leading EdTech startup. Recent achievements include a $20,000 award from Khmer Enterprise in 2020, the Best Tech Startup of the Year at the Cambodia ICT Awards 2020, and a prestigious award from the ASEAN Impact Challenge in 2019.

With Sala, institutions benefit not only from cutting-edge technology but also from a reliable partner dedicated to the long-term success and quality of Cambodian education.

Why we do what we do for schools

The majority of schools in Cambodia rely on paper forms and Excel in managing administrative work and academic information.

That leads to difficulty and spending a lot of time and increases the workload for teachers and takes away their time focusing on teaching and supporting student engagement.

Without access to high-quality data on individual student performance, attendance, study record, and enrollment history which is essential for schools in Cambodia and link to effective decision-making on all levels.

Why we do what we do for students

Hundred thousand Cambodian graduates yearly face limited access to information and struggle to find their path to university.

Navigating their way through the Cambodian education system is a challenging affair, especially for people from marginalized communities with poor access to training and relevant skills. Lack of information about career options, content of studies, entrance requirements and scholarship opportunities can discourage people from seeking further study.

Relying on information from piece of paper, friends and family, who themselves had little opportunities and exposure to modern technology, young people are very limited in their choices and often end up frustrated.

Our Flagship Products

The School Operating System

Allows schools to do attendance, schedule classes, keep track of student data and more...

www.sala.tech

The University Information and Enrollment Gateway

Allows students from anywhere in Cambodia to find and enroll in Universities in Phnom Penh.
