Dear Jose and Trym,

I hope this mail finds you well. As we discussed on Telegram, Plastiks team is very interested in implementing the USSD wallet solution that you have.

I have forwarded them the documentation and will let you guys figure out the next steps.

From our previous conversations, the main goal here is to use this offline technology to enable crypto dispursments of funds to plastic waste pickers.

My self and Ahmed have seen a demo from the xCapit team and were really impressed by the potential use case, especially in rural areas without internet connection.

On the other hand, this solution is also being implemented by the Creative operations team and UNDP Georgia for their e-waste pilot as well.
So if you need me to connect you with them let me know.

We are super excited to see this partnership form and let us know if there is anything else we can help you with

Looking froward to hearing back from you.

Best regards,
Burcu Mavis

Dear Burcu,

Thank you for your email.

I have connected with Trym and we are discussing the solution implementation.

@trym, as discussed we can have a call next week to go over the flow within the plastiks platform and figure out the best integration path.

Although as you have seen from the demo I have sent it's pretty straight forward. Nevertheless, if we need to make any changes we can figure that out.

Best regards,

Jose Ignacio Trajtenberg

Dear Jose,

Thank you so much for your email and for sending over the Demo. I don't think there is a need to change anything within the solution itself and it should be a straight forward integration.

Concerning the call, next week is great, I will forward you my availability on telegram and will also add our tech team to the call. It would be great if you can do the same so the guys can start working right away.

Regards

Trym,

Sounds like a plan, I've added our devs to the telegram channel.

Best regards,

José
