Subject: Expression of interest of the Ministry of Planning & Development of Ethiopia in working with UNDP in the implementation of proposal of application of blockchain technology in the national Carbon market

Dear Burcu,

As discussed, Obi and I are in close touch with the Ministry of Planning & Development of Ethiopia, which is eager to work together with us in partnership.

Please see below an email received in September by Ms. Hanna [redacted] Advisor to the Minister, after we shared and discussed with them our first proposal for application of blockchain technology to the Ethiopian Carbon market. After this communication we have been in contact with the Ministry while preparing the Roadmap.

Best regards,
Pau

Subject: Re: please use this updated version of the proposal - we have still to finalize it this week

Dear Pau,
After consultation with experts in this field, we believe the proposal holds great potential after seeing the demo, while aligning with the critical areas that reflect the Ethiopian Government's strategy for 2026.
The Ministry remains committed to work closely with UNDP as we always have.
I have already went ahead and got approval as we have already allocated budgets and personel to this vertical for this year and we are confident that the pilot will be a great success.

Please keep us posted on the progress and when we can jump in to help with the pilot.
