Subject: Fw: Fw: : Updates on Stakeholder Outreach (Stakeholder correspondence)

Dear Burcu,

Please find below the correspondence with the stakeholder, Romanovci Solar Power Plant (i.e. the company “Profing Ltd. Banja Luka”), which participated in the piloting of our blockchain initiative.

I sent the Partner Participation Agreement to Mr. Lipovčić, the owner, and he replied that he would be glad to participate in our activities, which he subsequently did.

As for the Ministry of Foreign Trade and Economic Relations of Bosnia and Herzegovina (MOFTER BiH), I do not have any formal correspondence regarding the formal establishment of cooperation for the pilot, as we were primarily targeting direct participants. However, the Assistant Minister of MOFTER, Mr. Softić, was very interested in and supportive of this initiative.

As discussed, if there is anything that can still be done at this stage, please feel free to propose an option that would suit your reporting needs, and I will check with the Assistant Minister whether it would be feasible for them.

Best regards,

Dejan

Below is the Google translation of the two emails exchanged with the PV plant owner (originally in the local language):

My email:"

Dear Miroslav,

Please find attached the Agreement on Participation in the Project (that is, the pilot demonstration of the use of blockchain technology), by which you would confirm your willingness to participate in the activities of this pilot project, for which you have already kindly provided us with electricity generation data for several months, and for which we are very grateful.

I am sending you both language versions, and in short, your obligations would be as follows:

For the Romanovci Solar Power Plant (SPP) (Producer):

- Participation in one or two short platform testing sessions.
- Providing access to monthly electricity generation data for the purposes of the pilot.
- Providing feedback on the user experience and on the final compliance report.

This agreement does not constitute and does not create any legal obligation for you; it is simply your consent to participate in the implementation activities. Therefore, it is sufficient that you confirm by replying to this email that you agree to participate, in accordance with the obligations listed above (in terms of platform testing, provision of generation data, and feedback on your experience in the pilot activities).

Kind regards,

Dejan"

Miroslav's response:"

Dear Sir/Madam,

I agree to continue participating in this programme and am pleased to accept.

Kind regards,
Miroslav Lipovčić, B.Sc. Electrical Engineer
"PROFING" d.o.o. Banja Luka

Poštovani,
saglasan sam za dalje učešće u ovom programu i sa zadovoljstvom prihvatam isto.

Srdačan pozdrav
Miroslav Lipovčić, dipl. inž. el.

Ovaj sporazum ne predstavlja i ne proizvodi nikakvu pravnu obavezu za, ovo je čisto vaša saglasnost za učešće u aktivnostima realizacije, **stoga je dovoljno da samo odgovorom na ovaj email potvrdite da ste saglasni sa učešćem** , a prema gore navedenim obavezama (u smislu testiranja platforme, dostavljanja podataka o proizvodnji i povratnim informacijama o iskustvu u pilot aktivnostima).

Srdačan pozdrav,

Dejan

Subject: Re: : Updates on Stakeholder Outreach

Good afternoon Dejan,

It was great seeing you earlier!
As discussed, here are the details on the pilot charter below.

As we move into the execution phase of the accelerator, we need to formalize our partnership with PV Romanovci and HIFA-Oil. This is a key deliverable for the program **(5.5 Confirmed Pilot Partnership)**, which requires "documented confirmation" of their commitment.

The most effective way to do this is with a simple Pilot Charter.
To make this as seamless as possible, we were hoping you could assist with approaching the pilot partners with a brief verbal introduction to the Pilot Charter in a call or meeting with them.

They need to understand that it's not a legal contract; it is just to make sure we are all aligned on the goals and roles for this pilot.
It's a short, one-page document that formalizes our shared objectives and ensures we're all on the same page.

You could follow up that discussion with an email with the charter attached, asking for a simple confirmation by reply.

This approach formalizes their commitment to our deliverables without requiring them to go through a lengthy signing process.

I have attached the revised Pilot Charter document for your review. Please let us know if this approach works for you or if you have a preferred method. (This document is also in our shared folder)

Thanks for your crucial support in moving this forward.

Vriendelike Groete
Best Regards
