Dear Noak,

Thank you for outlining the proposed collaboration so clearly.

This accurately captures our shared understanding of the roles and scope of engagement for Project Solar Village. REAN is happy to support the initiative as described, on a non-binding and good-faith basis, with the aim of contributing to knowledge sharing and learning within the minigrid ecosystem.

We look forward to receiving the summary of outcomes and key lessons learned upon completion of the survey.

Kind regards,

>> Thank you again for the positive response and support. To keep things clear and expectations aligned internally, we would like to briefly formalize this collaboration in writing.
>>
>> Our understanding for project Solar Village is as follows:
>>
>> - UNDP Nigeria, represented by Osondu Ogbodo and team, is leading the research initiative and its learning objectives around minigrid data and minigrid operator’s apetit for carbon-credit financing.
>> - CUBID, represented by Noak Lindqvist (Founder), is supporting UNDP Nigeria by coordinating the research survey, messaging, follow-up and analytics, and remains available for clarification or additional support as needed.
>> - REAN, represented by Joseph Ekpo-Mkpang (Membership Management & Admin Officer), is kindly supporting the initiative by sharing the survey link with REAN's members and promoting participation in an upcoming newsletter or similar communication, where possible.
>>
>> Following completion of the survey, CUBID and UNDP Nigeria will share a summary of outcomes and key lessons learned with REAN for the benefit of its members and the wider minigrid ecosystem.
>>
>> This is a non-binding, good-faith collaboration with no financial or legal obligations, intended solely to support knowledge sharing and sector learning.
>>
>> Please let us know if this captures our shared understanding correctly. If so, we would appreciate a brief reply from each of you confirming your agreement.
>>
>> Warm regards,
>> Noak

the email below for details.

I would like to explore the possibility of getting your help with distributing this survey. We are hoping to primarily reach owners, operators and/or facility managers for mini-grids. Secondarily, we are also hoping to capture the views of contractors.

Would you be willing to help us with one or more of the following:

1. help us with providing an email list that we could send this survey to (our preferred option)
2. we would also appreciate it if you could forward the email below to your members
3. include a call-to-action with a link to the survey in your newsletter

In return, we would be happy to share the outcome from the survey and the lessons learned with you and your members.

Please reach out to Osondu or myself for any questions.

Best regards,
Noak
