SDG BLOCKCHAIN ACCELERATOR

Debugging and Testing Report – Plastiks

Plastiks – QA Testing Report

1. Overview

This document summarizes the functional and system testing performed on the Plastiks platform. The objective of this testing cycle was to validate core user flows including authentication, plastic credit creation, administrative controls, payments, and general platform navigation.

2. Test Summary

Category	Total Test Cases	Passed	Failed
Login & Authentication	6	6	0
Admin Verification	2	2	0
Plastic Credit Flow	4	3	1
Roadmap	2	2	0
Payments	3	1	2
Explore / Users / Entities	8	7	1
UI & Filters	5	5	0
Profile & Wallet	2	2	0
Total	**32**	**28**	**4**

3. Key Findings

Strengths

- Authentication flows (Gmail and wallet connections) are stable and function as expected.
- Administrative verification and permission logic are correctly implemented.
- Plastic credit creation behaves correctly when valid inputs are provided.
- Navigation across users, recovery entities, and campaigns is consistent and responsive.
- Filtering, sorting, and UI controls operate correctly.
- Profile settings and wallet interfaces function as intended.

Critical Issues Identified

1. Payment System Inconsistencies

Transactions display a “Payment Confirmed” status even when:

- Funds are not reflected in the wallet
- Invalid card inputs still produce confirmation messages

Impact: High — affects financial accuracy and user trust
Priority: Critical

2. Plastic Credit Validation Gap

Plastic credits can be created using invalid form data.

Expected: Validation errors should prevent submission
Actual: Plastic credit is created

Impact: High — compromises data integrity
Priority: High

3. Plastic Credit Detail Page Failure

The plastic credit detail page fails to load and returns a gateway error.

Impact: High — core feature is inaccessible
Priority: High

4. Search Functionality Issue

Search functionality for recovery entities does not return expected results.

Impact: Medium — affects usability and discoverability
Priority: Medium

4. Detailed Test Cases

4.1 Authentication & Login

Test Case	Scenario	Expected Result	Actual Result	Status
TC_001	Main page load	Page renders without error	Works correctly	Pass
TC_002	Gmail login (valid)	Successful login	Works correctly	Pass
TC_003	Empty email field	Error message displayed	Works correctly	Pass
TC_004	Invalid email format	Error message displayed	Works correctly	Pass
TC_005	Wallet connection	Wallet connects successfully	Works correctly	Pass
TC_006	Alternative login methods	Address generated and login completed	Works correctly	Pass

4.2 Admin & Authorization

Test Case	Scenario	Expected Result	Actual Result	Status

TC_007	Admin verification	Verified indicator displayed	Works correctly	Pass
TC_008	Create plastic credit access	Feature enabled for authorized user	Works correctly	Pass

4.3 Plastic Credit Flow

Test Case	Scenario	Expected Result	Actual Result	Status
TC_009	Invalid form submission	Validation error prevents creation	Plastic credit created	Fail
TC_010	Valid form submission	Plastic credit created	Works correctly	Pass
TC_011	Admin approval and activation	Credit visible in system	Works correctly	Pass
TC_012	Credit detail page	Page loads successfully	Gateway error	Fail

4.4 Roadmap

Test Case	Scenario	Expected Result	Actual Result	Status
TC_013	Create roadmap (valid input)	Roadmap created	Works correctly	Pass

TC_014	Create roadmap (invalid input)	Validation errors displayed	Works correctly	Pass

4.5 Payments

Test Case	Scenario	Expected Result	Actual Result	Status
TC_015	Support flow	Correct page displayed	Works correctly	Pass
TC_016	Invalid card payment	Transaction rejected with error	Incorrect success message	Fail
TC_017	Valid payment	Transaction confirmed and reflected	Not reflected in wallet	Fail

4.6 Explore / Users / Entities

Test Case	Scenario	Expected Result	Actual Result	Status
TC_018	Users page	User data displayed	Works correctly	Pass
TC_019	Search users	Correct user returned	Works correctly	Pass
TC_020	Recovery entities page	Entity data displayed	Works correctly	Pass

TC_021	Search recovery entities	Relevant results returned	Not functioning	Fail
TC_022	Campaign details	Campaign page displayed	Works correctly	Pass
TC_023	Explore page rendering	Full page rendered	Works correctly	Pass

4.7 UI Controls & Filters

Test Case	Scenario	Expected Result	Actual Result	Status
TC_024	Slider navigation	Slides move correctly	Works correctly	Pass
TC_025	Country filter	Results filtered accurately	Works correctly	Pass
TC_026	Sorting options	Data sorted correctly	Works correctly	Pass
TC_027	Map view	Locations displayed correctly	Works correctly	Pass

4.8 Profile & Wallet

Test Case	Scenario	Expected Result	Actual Result	Status

TC_028	Profile settings	Editable settings page	Works correctly	Pass
TC_029	Wallet view	Wallet details displayed	Works correctly	Pass
